Projects

- Smart Medicine Reminder System** 
- Developed an intelligent healthcare assistant application for medicine scheduling and reminder management
 - Implemented prescription tracking, automated notifications, and voice-enabled medicine reminders
 - Integrated AI-powered chatbot support for instant healthcare guidance and user assistance
 - Designed a secure and responsive dashboard with authentication, medicine management, and user-friendly navigation
- Bus Booking System – Web Application** 
- Developed a responsive web-based bus ticket booking system that allows users to search buses, view routes, and book tickets seamlessly.
 - Implemented user authentication to enable secure login and personalized booking experience.
 - Designed an intuitive booking flow including seat selection, ticket booking, and booking confirmation.
 - Integrated real-time seat availability updates to prevent double booking and ensure accurate reservations.
 - Enabled users to view and manage their booking history for better convenience and tracking.

Hackathon

- SMART INDIA HACKATHON, Blockchain-based Supply Chain Tracking**
- Proposed solution leveraging distributed ledger technology for transparency, traceability, and fraud prevention in supply chains
 - Demonstrated innovation, technical design, and teamwork in presenting the idea
